Luxemburg Police Department

2020 Annual Report

To the Honorable members of the Luxemburg Village Board,

       I hereby submit this Annual Report for the year for 2020 to you for your inspection and review. This report has been generated with data captured from the Spillman records management system, as well as crime data submitted to the Wisconsin Department of Justice and Federal Bureau of Investigation.

       While this summary report does not give a complete accounting on every action, activity and function of the department, it does give a snapshot into the areas that are often topics of question, such as incident volume and type, as well as citations and warnings issued.

       I have expanded on supplying the Board crime statistics from the Wisconsin Department of Justice, which shares data with the Federal Bureau of Investigation. With smaller municipalities and agencies, please look at the overall numbers in general more than any percentages listed; as an increase of one crime from zero the year before will show a 100% increase (or decrease if it is one less). As you review the crime reports, Group A Crimes also rate more serious than Group B Crimes.

       Please accept this report on my behalf and feel free to contact me if you have questions.

Respectfully Submitted,

Chris A. Gulbrand

Chief of Police

COVID 19 procedures and exposure risks minimized warnings in 2020.

Counting Rules

Counts on this page are based on the month of the incident or arrest, rather than the month the incident was submitted. If the incident date is unknown, the report date is used. Counts are subject to change as data are updated.

Offense counts are calculated based on the number of offenses for each victim (per incident) for Crimes Against Persons and the number of unique offense types (per incident) for Crimes Against Property and Crimes Against Society. For burglary and motor vehicle theft, offense counts are based on the number of premises entered and the number of vehicles stolen, respectively.

Victim counts are calculated based on the number of victims connected to each unique offense type in an incident. For Crimes Against Persons, the number of victims will be equal to the number of offenses. Victims will be counted more than once if they are connected to multiple offenses.

Arrest counts are calculated based on the number of arrestees listed on a Group A or Group B incident. Each arrestee is counted only once per incident. Arrests are categorized based on the specific Group A or Group B arrest code submitted by the agency, rather than the incident offense code. Since agencies only submit the most serious arrest charge for each arrestee on an incident, arrest counts are not indicative of the number of charges.

Incidents are cleared in one of two ways: by arrest or by exceptional means. Clearance counts are based on the number of offenses cleared in a given month regardless of when the offense occurred, and can therefore be greater than the number of offenses in a given month. In incident-based reporting, the first arrest on an incident, or an exceptional clearance, will clear all offenses associated with the incident.
